TECHNICAL STACK

Frontend: React 19, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion

Backend & API: Firebase, Firestore, REST APIs, PHP (Laravel)

Database & Cloud: Firestore, Firebase Authentication, MySQL, Supabase

AI & Productivity: Gemini AI, GitHub Copilot, ChatGPT, Claude AI, AI Prompt Engineering

Tools: Git, GitHub, VS Code, Postman, Figma

PROFESSIONAL EXPERIENCE

Software Engineer

SportsPilotAI

December 2025 – Present

- Develop and maintain AI-powered SaaS platforms using React, Next.js, TypeScript, Firebase, and Firestore.
- Design and implement full-stack features including reporting systems, communication tools, notification services, workflow automation, and real-time data synchronization.
- Build scalable cloud-based applications with secure role-based access control, responsive user interfaces, and optimized user experiences.
- Engineer and maintain complex data models, business workflows, and platform integrations to support operational efficiency and user engagement.
- Collaborate with cross-functional teams on architecture planning, database migrations, testing, bug resolution, feature delivery, and production deployments.
- Contribute to platform modernization initiatives, feature enhancements, performance improvements, and continuous product development across multiple SaaS solutions.

PHP Developer – Technology Developer
eduClaaS Pte. Ltd. (Singapore)
November 2024 – December 2025

- Contributed to the development and maintenance of web applications using PHP (Laravel), JavaScript, HTML, CSS, and MySQL.
- Implemented front-end and back-end functionality for internal and client-facing applications.
- Participated in testing, debugging, deployment, and collaborative software development workflows using Git and GitHub.

Conversational Marketing AI Application

- Contributed to the development of an AI-powered marketing platform utilizing Laravel, API integrations, Git, and GitHub while collaborating within an industry-accredited software engineering program.

PERSONAL PROJECTS

AutoCare+ (Vehicle Maintenance Tracking Application) | Next.js 14, React, TypeScript, Tailwind CSS, Supabase | 2026

- Developed a full-stack vehicle maintenance tracking application for vehicle owners to manage vehicles, maintenance history, service reminders, and profile information.
- Implemented Supabase authentication with email/password and Google OAuth, protected routes, user-specific dashboards, and row-level security for owner-based data access.
- Built vehicle CRUD, maintenance logging, reminder management, and automatic reminder generation using a static rule-based maintenance recommendation engine.
- Designed a dark responsive dashboard UI with reusable components, Framer Motion animations, and structured workflows for vehicles, maintenance records, and upcoming reminders.

LunarLedger (Personal Budget Management Application) | React 19, Vite, Tailwind CSS, Chart.js, FullCalendar | 2026

- Developed a personal finance and budgeting application focused on weekly salary management, payable tracking, and spending analysis.
- Built planner and insights workflows separating financial management from analytical reporting.
- Implemented interactive financial visualizations using Chart.js and calendar-based planning using FullCalendar.
- Developed custom budgeting utilities for safe-to-spend analysis, cumulative expenses, and budget forecasting.

Personal Portfolio Website | Next.js, React, TypeScript, Three.js, Tailwind CSS | 2026

- Designed and developed a futuristic portfolio website that showcases software engineering projects, technical expertise, and professional experience through an immersive digital experience.
- Built interactive UI components, animations, and custom 3D visualizations using Three.js and modern front-end technologies to create a distinctive user experience.
- Implemented responsive layouts, reusable component architecture, and performance-focused design principles using React, Next.js, TypeScript, and Tailwind CSS.

EDUCATION

Bachelor of Science in Information Technology — Major in Software Engineering
University of Cebu (Philippines) & EduCLaaS Litan (Singapore)
Expected Graduation: 2028

CERTIFICATIONS & ACHIEVEMENTS

- Applied Degree in Software Engineering (In Progress)
- GitHub Student Developer Pack
- EduCLaaS / Litan Software Engineering Program
